Time Manager is built with you, not to watch you

We heard the concerns the union raised. Here is exactly what the new tool does, what it does not do, and who shaped it.

One button, a few seconds

Clocking in or out is a single tap. No forms, no extra steps added to your day.

Your hours, your view

You can see your own recorded hours at any time. Nothing is hidden from you about your own data.

Shaped with the union

Every screen was reviewed against the concerns CGT-U raised before it was built.

WHAT CHANGES FOR YOU, IN THREE STEPS

1

Open the app, tap clock in when your shift starts

2

Tap clock out when you leave, that is the whole task

3

Check your weekly hours any time, right from the same screen

Questions or concerns about the rollout? Raise them with your union representative or the project team, we are listening.
