What changes for you as a manager

Time Manager is not a new reporting duty. It replaces the manual tracking you already do, and nothing more is asked of you on top of it.

Overwork flags itself

Anyone over their expected hours is highlighted automatically on your team view, you do not calculate anything by hand.

No new forms

Your team's hours populate on their own as employees clock in and out, nothing for you to enter or chase down.

YOUR DASHBOARD AT A GLANCE

1

Team size and average hours, updated on their own

2

Anyone flagged for over or under hours, sorted to the top

3

One click into any employee's detail, no separate tool needed

A short walkthrough session is being scheduled before rollout, no preparation needed on your end.
